INTRODUCTION

Welcome to Space Wars. The year is 2033. Earth is at war with the Kyartyglotes, an ancient alien race from the planet Kyzaar. As a result of a scouting mission gone wrong, you've found yourself stranded 10,000 miles North of Jupiter's equatorial plate - right in the heart of Kyartyglote territory. With just a single laser cannon working, you're about to face off against the strongest unit of the Kyatryglote army; the Kyelshevics.

NAVIGATING THE MAIN MENU

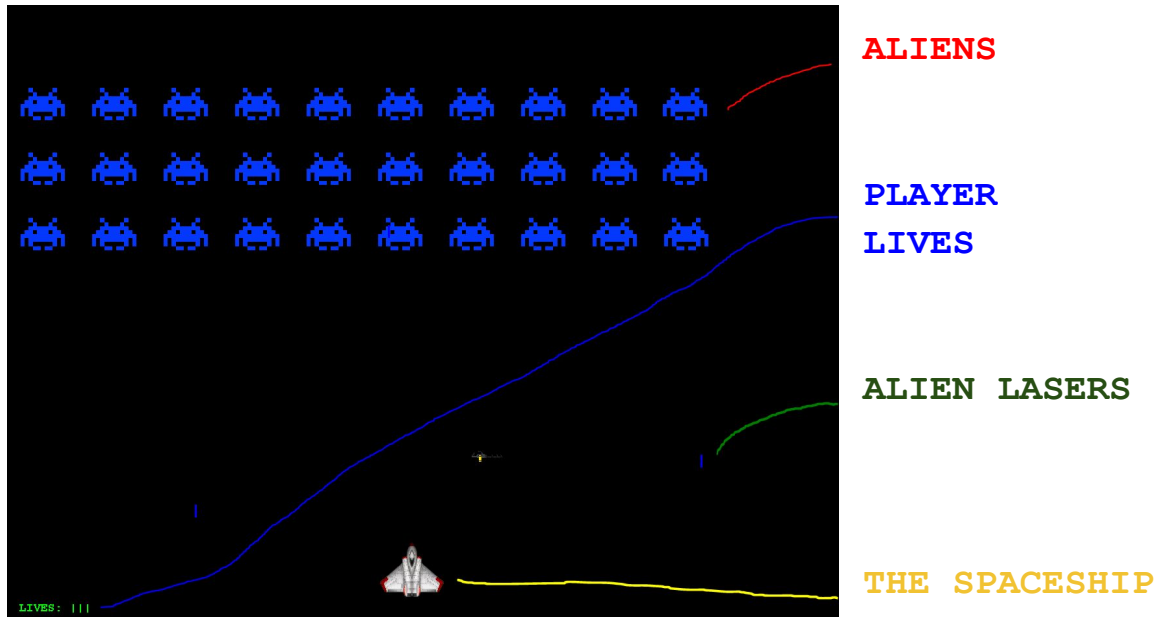

PLAY BUTTON Clicking this button will start the game.

INSTRUCTIONS BUTTON Clicking this button will take you to the instructions page. The instructions page is similar to a condensed version of this page.

EXIT BUTTON Clicking this button will close Space Wars.

PLAYING THE GAME

ALIENS These are the Kyelshevics. They will move from side to side, changing directions as they hit the edges of the screen and will move closer to the Spaceship over time.

PLAYER LIVES These three tick marks shown on the screen represent the three lives the player starts off with. Watch out for the ALIEN LASERS! That's how you lose lives! And if you lose all three lives, it's game over.

ALIEN LASERS These blue, red, green or yellow lasers are shot by the aliens towards the spaceship. Each time you get hit by a laser you will lose a life (ie. from ||| to ||).

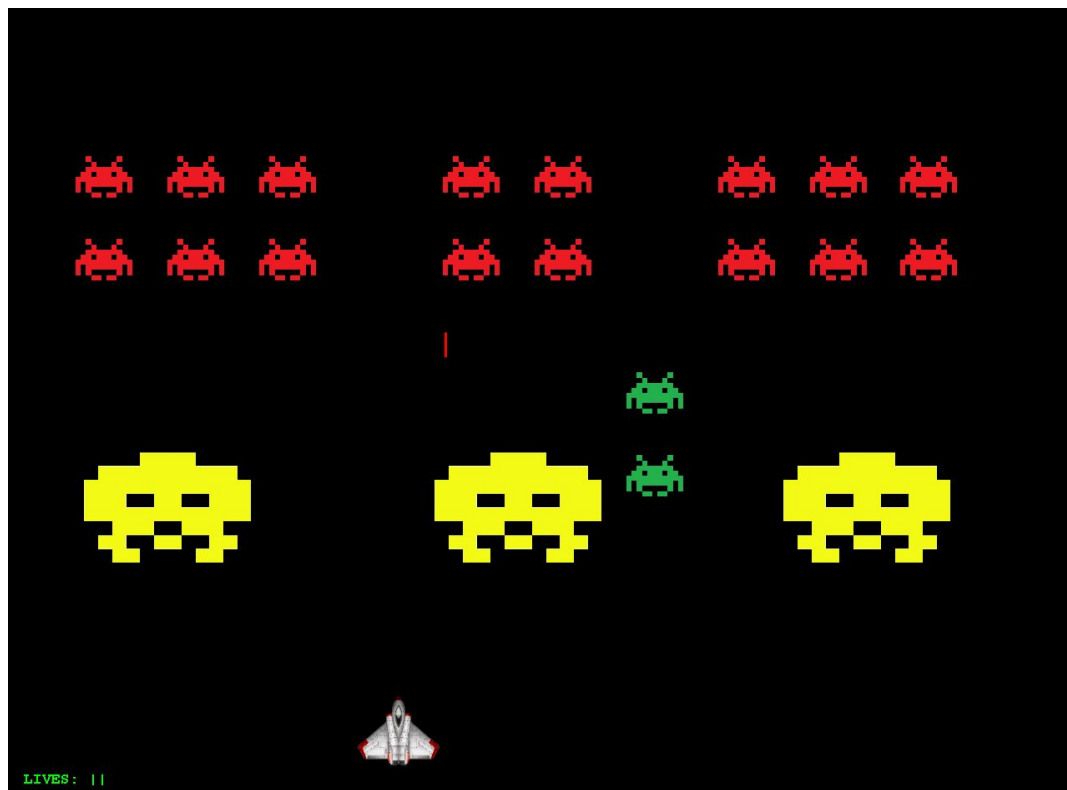

THE SPACESHIP This is you!

HOW TO WIN

The game is won once all four waves of the Kyelshevics have been killed using your laser cannon.

SPECIAL ALIENS

Remember that the Kyelshevics are the Kyartyglotes' strongest army. Because of this, you'll face some pretty tough enemies. Here are the special Kyelshevics, and what you should know about them.

ALPHAS These aliens are slightly better than regular Kyelshevics. They take two shots to kill, and fire a laser that is faster and larger than their lower-ranked counterparts.

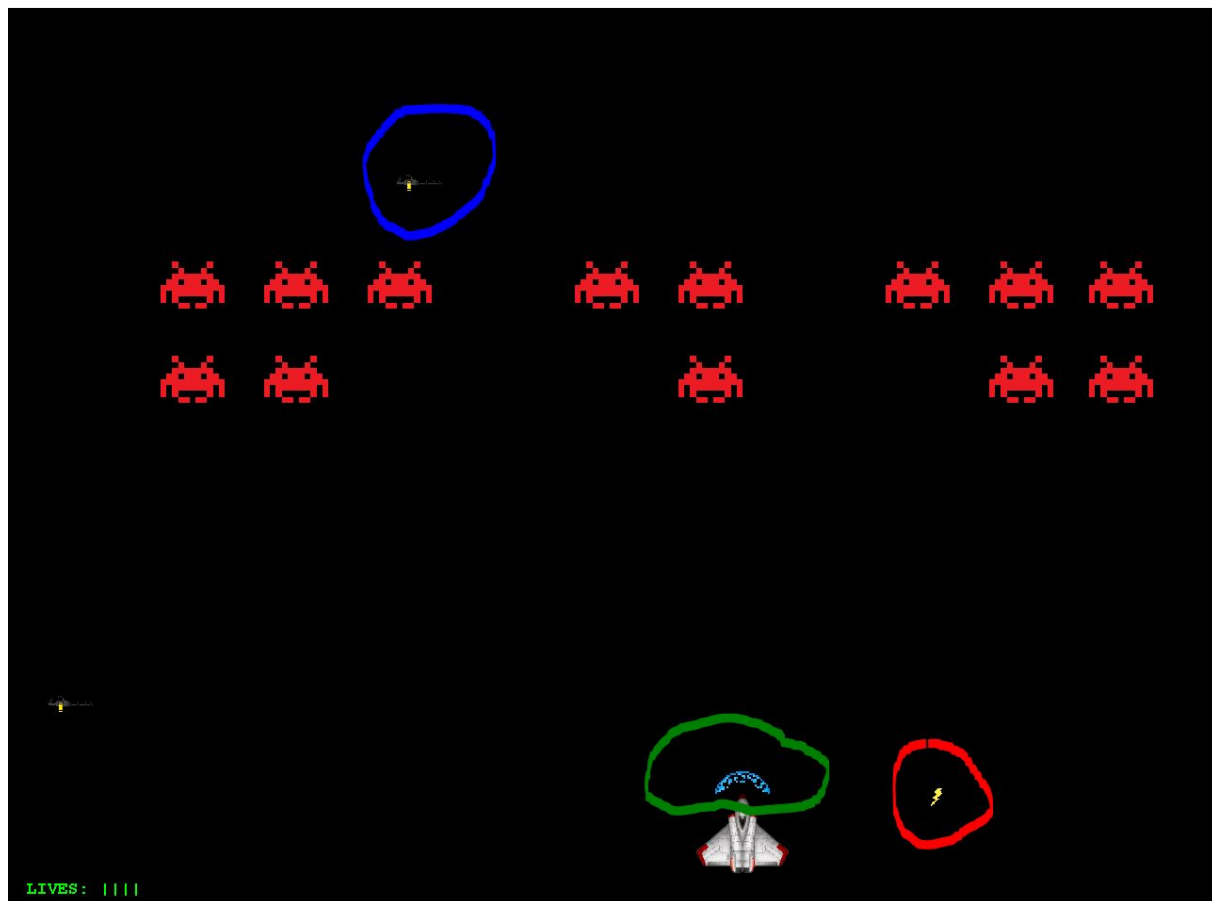

SPEED RACERS These aliens are significantly faster and more nimble than regular Kyelshevics. However, they

only take one shot to kill and fire a laser that is extremely slow and small.

TANKS These aliens move at the same speed of normal Kyelshevics and fire a laser that is of very small size and slow speed. However, make sure to take these aliens out early, as they take ten shots to kill.

POWERUPS

Being Kyartyglote territory, valuable space debris called powerups will frequently fly towards you. Touching these powerups will give your Spaceship awesome abilities!

SPEED BOOST This powerup greatly increases the movement speed of the spaceship for eight seconds.

MACHINE GUN This powerup doubles the fire rate of the laser cannon of the spaceship for six seconds.

FORCEFIELD This powerup gives your spaceship a forcefield for ten seconds. If you are shot while the forcefield is equipped, you will not lose a life and instead the forcefield will be destroyed.

CONTROLS

Use the A and D keys or the LEFT and RIGHT arrow keys to move your spaceship. Press and hold SPACEBAR to fire your laser cannon, and at any point in the game, press ENTER to initiate a pause screen with a restart, main menu and exit button.

CONCLUSION

That's all, good luck soldier! Go make Earth proud.
Thanks for playing!
